We have all had more or less the experience of many types of plans including MLM or Pyramid Scheme, Binary, Uni-level or Matrix and this experience is so much that now many of us are tired and even annoyed.

Seeing all this, we realized at some point that most people can't survive in this plan as a platform to fulfill their dreams. Although a small number of people can reach the goal due to long-term hard work and final decision. And the reason most people fail to get to the final stage is because of marketing plans and tough conditions. For example, monthly maintenance costs or making it compulsory to buy products every month and adding new people and then becomes a big challenge and these are the main reasons for failure. Also, many companies cannot continue after promising to pay multiple dividends against the investment because their money investment is not used properly or in the right place. As a result, many online platforms are forced to shut down their sites at some point. For these reasons, countless people around the world are losing confidence in MLM or investment platforms day by day.
